PROFESSIONAL SUMMARY

Motivated frontend developer with a Physics background and a strong command of React, TypeScript, Vite, and Tailwind CSS, with growing experience in backend-light architectures using Supabase and FastAPI. Experienced in data analysis and simulation tools, and driven by a desire to create practical, real-world solutions through code. Has independently built and shipped multiple full front-end applications — from e-commerce platforms to utility tools — and is exploring product strategy for an agri-tech marketplace connecting Nigerian farmers with distributors. Known for being collaborative, adaptable, and eager to contribute to forward-thinking development teams.

SELECTED PROJECTS

MeterCalc — Shared Electricity Billing Tool

[React](#) · [Vite](#) · [Supabase](#) · [Live Demo](#) · [Source](#)

- Rebuilt a utility billing tool for a residential compound manager, calculating shared electricity costs from individual meter readings against a shared Supabase backend with row-level security.

Alakowe — Second-Hand Book Marketplace

[React](#) · [TypeScript](#) · [Tailwind CSS](#) · [React Router DOM](#) · [Live Demo](#) · [Source](#)

- Independently building the "How It Works" page for a Nigerian second-hand book marketplace, using a multi-component folder structure for maintainability.

FASCO — Fashion E-Commerce Platform

[React](#) · [Vite](#) · [Tailwind CSS](#) · [Live Demo](#) · [Source](#)

- Built a full multi-page application covering shop listings, authentication flow, product detail pages, cart, and checkout, with pixel-accurate UI fidelity to design specs.

Movie Explorer App

[React](#) · [TMDB API](#) · [Context API](#) · [Source](#)

- Built and deployed a movie discovery app consuming the TMDB API, with state managed via Context and localStorage; deployed to Netlify and version-controlled on GitHub.

Agri-Marketplace Concept

[Product Strategy](#) · [React](#) + [Vite](#) + [Tailwind](#) + [Supabase](#) (planned)

- Scoped a platform concept connecting Nigerian farmers with distributors and buyers, including a four-phase Validate → Build → Grow → Scale roadmap.

WORK EXPERIENCE

Frontend Software Engineering Intern — The Haven & Hues, Lagos

2025 – Present

- Developed responsive web pages using HTML, CSS, JavaScript, and modern frameworks like React.
- Converted UI/UX wireframes and design mockups into clean, accessible, high-performance code.
- Fixed bugs and improved page load speeds to enhance overall user experience.
- Wrote unit tests and debugged front-end code to ensure cross-browser compatibility.
- Collaborated with product managers, designers, and backend engineers using Git/GitHub, daily standups, and sprint planning.

Resource Centre Supervisor / Mathematics Teacher — Rotshol Splendid Private School, Lagos

2017 – 2018

- Taught Mathematics to senior secondary students preparing for external examinations.
- Supervised the school's resource centre and taught students Computer Science.

Desktop Publisher — Rose of Sharon Café, Ikeja, Lagos

2015 – 2017

- Created and edited professional documents and publications for various clients.
- Delivered high-quality, print-ready designs under tight deadlines.
